

TCCIA Summer Conference

“Relax, Reflect, and Recharge”

June 5-7, 2016

Omni Hotel, San Antonio, TX

Our conference is following a different format this year. The premise behind this year’s TCCIA Summer Conference is that we learn best from each other. During the conference participants will engage with one another and experience a revolution of transformation by hearing what other people do at their own colleges/organizations. We will use group discussions and working groups to identify our most pressing challenges, work through them and talk about innovations we have discovered in our different campuses. The goal is to learn from each other’s experience and ignite fresh ideas and trigger possibilities for participants to utilize in their own colleges. At the end of the conference we will have a listing of common challenges across the state, a list of innovations and best practices, and hopefully an expanded network of contacts among colleges.
